### Create a storage account

Basics Advanced **Networking** Data protection Encryption Tags Review

**Network connectivity**

You can connect to your storage account either publicly, via public IP addresses or service endpoints, or privately, using a private endpoint.

Network access \*

☒ Enable public access from all networks

☐ Enable public access from selected virtual networks and IP addresses

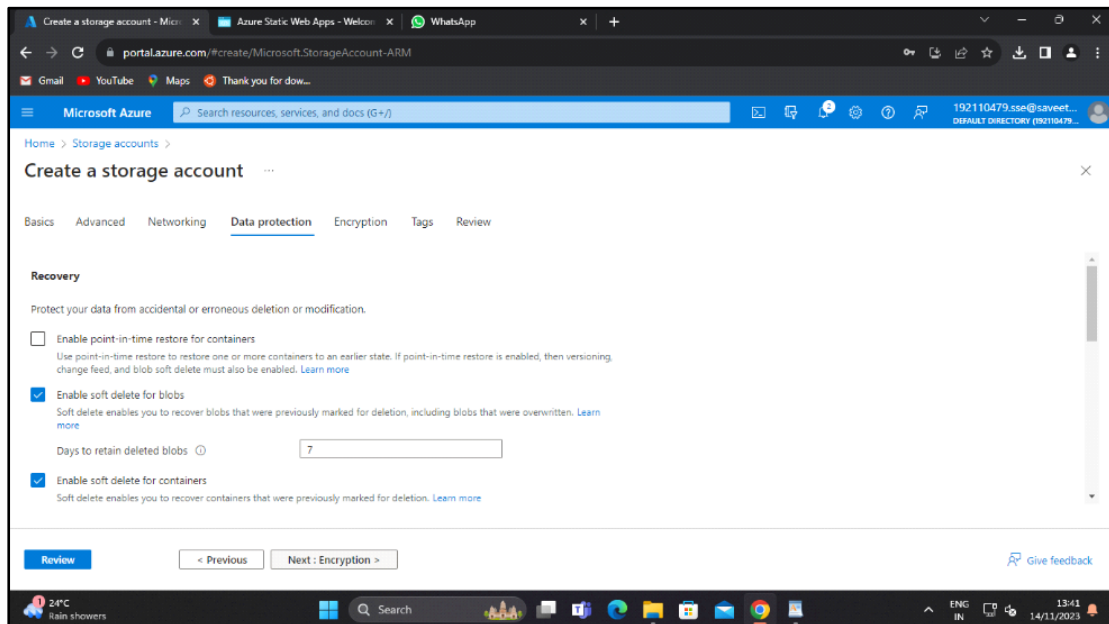

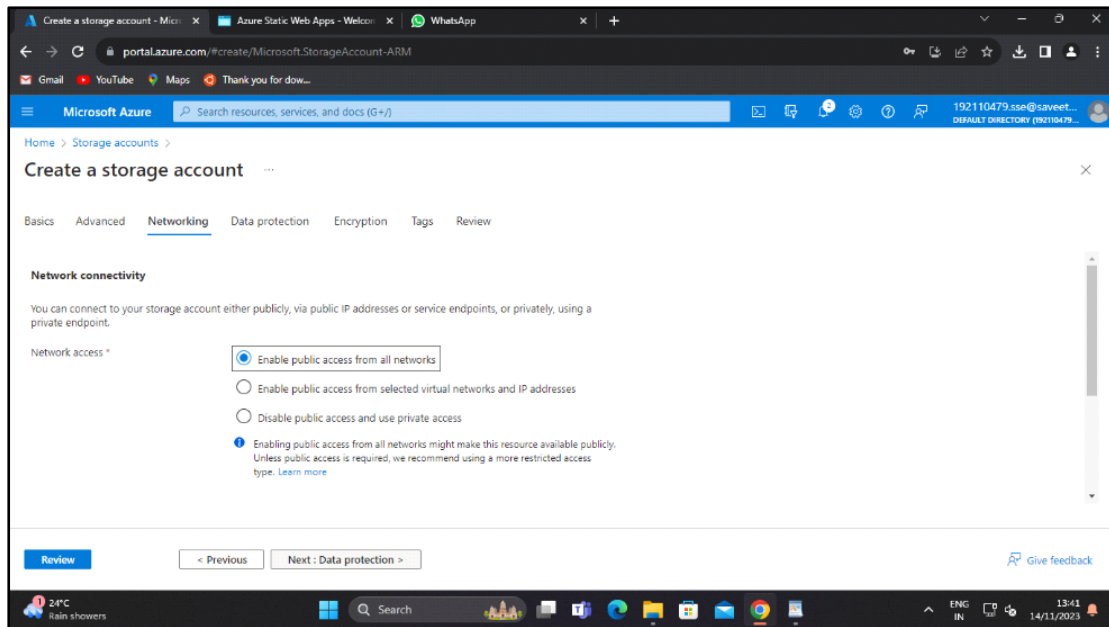

☐ Disable public access and use private access

**!** Enabling public access from all networks might make this resource available publicly. Unless public access is required, we recommend using a more restricted access type. [Learn more](#)
